WORK EXPERIENCE

Codingmart Technologies Private Limited Product Engineer (2021 - Present)

A full-stack product & engineering consulting company working with companies of all sizes globally to help build their technology products.

Project: Kalanju (Full Stack)

- Worked on the company's internal project Kalanju, which involved maintaining employee information such as personal details, salary, project history, and attendance.
- Developed an employee resignation module and new features based on the requirements.
- Monitoring the system and taking action in case of any issues.

Project: Perromart (Full Stack)

- Worked on the development of Perromart, Singapore's largest fully-fledged e-commerce platform.
- Designed and implemented responsive layouts and ensure cross-browser compatibility.
- Implemented coupon feature that includes automatic coupon functionality.
- Implement a custom, admin dashboard that allows administrators to manage the website, products, and orders efficiently.

Project: ExtraMile Play (Back End)

- Worked on the development of Phase 3 of ExtraMile Play, a virtual platform designed for employee engagement and game management.
- Developed robust APIs to support new features and collaborated with front-end developers to ensure seamless integration of elements.

Project: PiriReis V3 (Back End)

- Worked on the development of Dorak V3, a tour and travel booking application accessible only by agents.
- Created robust APIs for generating and managing sheets for bulk creation, updating, and deletion of various services.
- Managed a total of 17 services, each associated with multiple sub-services.
- Indexed all data in Elasticsearch for easy search and retrieval.

AWARDS

Sep 2022 | Codingmart Technologies

Award: The Unexpected Coder

Recognized as "The Unexpected Coder" by Codingmart Technologies on the Engineers Day Celebration for my outstanding contributions to the company's software development projects.

March 2023 | Codingmart Technologies

Award: The Silent Power

Recognized as "The Silent Power" by Codingmart Technologies on the 10th year Anniversary Celebration for demonstrating a quiet but impactful presence in the workplace.

EDUCATION

2018 - 2022

Sri Shakthi Institute Of Engineering and Technology

B.E Computer Science

CGPA : 8.17

PERSONAL DETAILS

Date Of Birth: 07-04-2001

Gender: Male

Nationality: Indian

Martial Status: Unmarried

Languages Known: Tamil, English

PROJECTS UNDERTAKEN

Project: **Plagiarism Detection Using AI (Full Stack)**

Description: Worked on the full-stack plagiarism detection application in which the admin can create faculty accounts. The faculty members receive their credentials via email to log in. The faculty can then schedule tests for students based on their department. Students can log in and submit their handwritten test papers on the platform. Once the students have uploaded their test papers, the faculty can check for plagiarism for the assigned class and provide feedback to individual students

Project: **Facebook Backend System (Back End)**

Description: Worked on the Facebook backend application clone where a user can add, and remove friends, create posts, and make it public or private with pagination to display the post.

Project: **E-Commerce Application (Full Stack)**

Description: Worked on the E-Commerce application where customers can find products, add them to the cart or remove them from the cart, and filter products. The application was developed using fake-API for product details, JWT authorization, state management like Redux, Node.js authentication, and storing data in MongoDB.

DECLARATION

I, hereby declare that the above mentioned information is true to the best of my knowledge.
